

# CWTS-200 Sanitization System

Heat Sanitization System

Designed for easy, reliable, and sanitary operation, the CWTS-200 is indispensable for carbon filter systems and cartridge filters that require rigorous microbial control.

Utilizing only components of the finest quality and built on a stainless steel structure for lasting durability, this unit is custom built for each application.

We Use Quality Components From:

- 316 SS centrifugal pump.
- Electronic temperature controllers with digital display accurately maintain temperatures during the preprogrammed sanitization procedure.
- Stainless Steel structure for lasting appearance and durability.
- Control Panel in NEMA 4X enclosure.
- High Efficiency 316 Stainless Steel shell and tube heat exchanger, rated for up to 250 PSI.
- Steam controls, modulating temperature control valves, steam trap.
